

HESSEL STATION VINEYARD

Named after a historic railway station once within view of the 16-acre site, Hessel Station Vineyard completes the Lynmar portfolio. Broadening the spectrum of estate Pinot Noir profiles, this distinctively cooler property in South Sebastopol features eight separate blocks. Building upon four decades of farming, rootstocks were carefully chosen to develop balanced vines.

CLIMATE & SOIL

This south Sebastopol vineyard thrives under the influence of Petaluma Gap's cooling winds and fog. The land boasts a gentle north-facing slope, maximizing year-round sunshine. Cotati fine sandy loam soils, formed from weathered sandstones and shales, cover the entire property.
